

keep in mind, keep safe

KEEP INTRUSION PROTECTION

Intrusion

For test report and approval according to SS-EN 1627, tests are performed according to SS-EN 1628 (dynamic tests), SS-EN 1629 (static tests) and SS-EN 1630 (manual intrusion attempts with tools). Doors in SP 56500 / SP 76500 meet the requirements of SS EN 1627 for intrusion protection class 3 and 4, and doors with filling in class 5 SS ENV 1627. According to type approval certificate, issued by RISE, these lots can be signposted as verification against set intrusion requirements. Parties with requirements for fire and burglary protection in combination can also be signposted, eg EI60 and RC4.
